Delivery Projects & Construction

300 New Albany Road

Moorestown, New Jersey 08057

November 5, 2014

Dear Neighbor,

PSE&G began the final phase of the Southern Reinforcement Project, the restoration of the roadway. Restoration work began and will continue until mid-December, weather permitting. PSE&G will not be working over the Thanksgiving holiday.

The restoration schedule has changed and restoration of the roadway base began on Lexington Ave. and Magnolia Ave. and will continue on Lexington towards West Maple Ave. After the roadway base is completed, final milling and paving will begin on Lexington Ave. and West Maple Ave. and continue on Lexington Ave., then onto Magnolia Ave., then onto Wysteria Ave., then onto Cuthbert Blvd to Rt. 38.

Restoration work will consist of the following measures: parking restrictions, traffic detours, milling the roadway, installing a concrete base in the roadway, roadway plating during concrete curing, final asphalt paving, and restriping of the roadway. Local police will be on-site to identify and post any necessary parking restrictions and provide traffic control.

All work will be performed by reputable contractors under the supervision of PSE&G. The contractors will adhere to all PSE&G safety and environmental standards and procedures, and work diligently with local police to minimize traffic disruption.

We will do everything feasible to complete our work expeditiously while maintaining the highest levels of safety for all involved or impacted by the road restoration.

We thank you for your cooperation and patience as we constructed this upgrade, which will assure safe and reliable power to your homes and businesses. If you have any questions or concerns during this last phase of our project, please contact us on our toll free program hotline at (866) 507-5961.

Sincerely,

Douglas Anthony
